

IN THE SPECIFICATION:

Please amend the specification as follows:

Paragraph beginning on page 3, at prenumbered line 8, has been amended as follows:

The case 2 has a hollow shell ~~211~~, 20, a face panel 21 mounting on a front side. The face panel 21 has a transverse window 211 to hold and receive the display device 4. The case 2 also houses a mechanism 3.

Paragraph beginning on page 4, at prenumbered line 21, has been amended as follows:

By means of the aforesaid construction, when ~~an~~ a user wants to store the display device 4 in the central armrest 1, first, he/she depresses the display device 4 downwards (as shown in FIG. 4). The linkage bar 321 of the folding and turning mechanism 32 will be moved to push the sliding dock 322 rearwards until the display device 4 folding flatly (referring to FIG. 5). User continuously pushes the display device 4 on the bottom end 41, the sliding mechanism 31 is channeled along the guide track mechanism 33 and slides inwards, and the push reed 312 at the rear end pushes the spring reed 331 to extend at the same time until the anchor bar 315 at the rear end is latched on the anchor dock 333 (as shown in FIG. 6). In that condition, the display device 4 is housed in the case 2.
